Dakshi HRMS — Employee Panel: Complete Knowledge Base

> **Compiled from:** 14 requirement documents (PDFs) in the Employee specification folder **Purpose:** Serve as the single source of truth for understanding, planning, and building the entire HRMS Employee Panel **Last Updated:** 2026-07-23

Table of Contents

1. System Overview
2. Module Registry
3. Module Deep Dives
    - 3.1 Personal Dashboard
    - 3.2 Profile Management
    - 3.3 Attendance & Time Tracking
    - 3.4 Leave Management
    - 3.5 Payroll & Salary
    - 3.6 Performance & Appraisal
    - 3.7 Training & Development
    - 3.8 Document Management
    - 3.9 Expense & Reimbursement
    - 3.10 Communication & Collaboration
    - 3.11 Helpdesk & Support Tickets
    - 3.12 Settings & Preferences
4. Role-Based Access Control (RBAC)
5. Inter-Module Dependencies
6. Technology Stack Alignment
7. Phased Build Roadmap

---

1. System Overview

Dakshi HRMS is a comprehensive Human Resource Management System designed as a self-service employee portal. The system transforms traditional HR functions into an automated, transparent, and mobile-first experience.

Core Principles

- **Self-Service First** — Employees manage their own data; reduces HR queues and paperwork
- **Real-Time Everything** — Live dashboards, instant notifications, real-time status tracking
- **Policy-Driven Automation** — Business rules are configurable, not hardcoded
- **Mobile-First & Secure** — Cross-platform (Web, iOS, Android) with enterprise-grade security
- **Compliance Built-In** — GDPR, labor laws, statutory regulations baked into the platform

Security & Compliance Standards

Area	Specification
Encryption	256-bit SSL/TLS for communication
Authentication	Multi-Factor Authentication (MFA)
Authorization	Role-Based Access Control (RBAC)
Data Privacy	GDPR compliant data handling
Legal	Adheres to labor laws — wage protection, employee privacy, grievance redressal
Backup	Regular automated backups with disaster recovery

2. Module Registry

The Employee Panel consists of **12 functional modules** + 1 overarching dashboard:

#	Module	Source Document	Priority	Status
1	Personal Dashboard	`Personal Dashboard Features.pdf`	🔴 Critical	Foundation
2	Profile Management	🔧 `Key Functions Under Profile Management.pdf`	🔴 Critical	Foundation
3	Attendance & Time Tracking	`Attendance.pdf`	🔴 Critical	Phase 1
4	Leave Management	`Leave Management Module.pdf`	🔴 Critical	Phase 1
5	Payroll & Salary	`Payroll & Salary Module.pdf`	🟠 High	Phase 2
6	Performance & Appraisal	`Performance & Appraisal.pdf`	🟠 High	Phase 2
7	Training & Development	`Training & Development.pdf`	🟡 Medium	Phase 3
8	Document Management	`Document Management.pdf`	🟡 Medium	Phase 2
9	Expense & Reimbursement	`Expense & Reimbursement.pdf`	🟡 Medium	Phase 3
10	Communication & Collaboration	`Communication & Collaboration.pdf`	🟡 Medium	Phase 3
11	Helpdesk & Support Tickets	`Helpdesk & Support Tickets.pdf`	🟢 Standard	Phase 4

12	Settings & Preferences	`Settings & Preferences.pdf`	Standard	Phase 1

- `Core Functionalities of HRMS Services.pdf` — System-wide overview
- `Employee panel.pdf` — Panel-level feature summary

---

3. Module Deep Dives

3.1 Personal Dashboard

Source: `Personal Dashboard Features.pdf`

The landing page every employee sees after login. A customizable, real-time overview of their work life.

Features

Feature	Description
Quick Overview	Today's attendance status, leave balance, upcoming holidays, pending tasks & deadlines
Real-Time Notifications	HR announcements, birthday/anniversary wishes, policy updates, reminders
Customizable Widgets	Drag-and-drop layout of modules (tasks, attendance, payroll). Dark/light mode toggle. Widget visibility preferences
Calendar View	Task deadlines, holidays, training schedules. Optional Outlook/Google Calendar sync
Personalized Greetings	Dynamic welcome message, motivational quote/ tip of the day, weekly productivity stats

Key Data Inputs (from other modules)

- Attendance status → from **Attendance Module**
- Leave balance → from **Leave Module**
- Upcoming holidays → from **Holiday Calendar** (shared)
- Pending tasks → from **Performance/Training** modules
- Announcements → from **Communication Module**
- Payslip status → from **Payroll Module**

3.2 Profile Management

Source: 🔧 `Key Functions Under Profile Management.pdf`

Complete employee profile lifecycle management with HR approval workflows.

Core Functions

1. Personal Information Management

- Full name, DOB, gender, marital status, nationality
- Contact details: permanent/current address, phone (mobile + alternate), official/personal email
- All changes go through **HR approval workflow** before final submission

2. Emergency Contact Management

- Add/update emergency contacts with relationship, phone, address
- Mark primary emergency contact

3. Document Upload & Management

- Supported documents: Aadhar Card, PAN Card, Passport, educational certificates, professional certifications, resumes, experience letters, joining documents
- Auto-validation of document format

- Expiry alerts for time-bound documents (ID proofs, visas)

4. Employment History & Role Tracking

- Complete lifecycle: date of joining, past roles, departments, promotions, designations, transfers, reporting manager history
- Downloadable employment history report

5. Profile Picture Upload

- Professional photo used across internal tools and portals

6. HR Approval Workflow

- Employee changes → sent to HR/admin for approval → then committed

7. Alerts & Notifications

- Missing profile details reminders
- Document expiry/renewal alerts
- Profile completion status tracker

3.3 Attendance & Time Tracking

Source: `Attendance.pdf`

Real-time monitoring of employee presence, working hours, and attendance behavior.

Core Functions

1. Multi-Mode Clock In/Out

- **Biometric Devices** — fingerprint/face recognition
- **Web Portal** — secure login from office systems
- **Mobile App** — with GPS & geofencing support for field staff
- Real-time sync across all devices

2. Attendance Dashboard

- Daily, weekly, monthly summaries
- Total hours worked, late arrivals, early departures
- Working days, absences, holidays
- Color-coded visualization for trends

3. Regularization Request System

- Request types: missed punches, incorrect in/out times, half-day/full-day adjustments
- Routed to reporting manager or HR for approval
- Status tracking: pending → approved → rejected
- Full audit trail on all changes

4. Real-Time Alerts

- Missed attendance logs
- Approval pending notifications
- Shift changes or work-hour anomalies

5. Payroll & Leave Integration

- Attendance data → **Payroll Module** (pay calculation based on present days/hours)
- Attendance data → **Leave Module** (deduct or regularize leaves)

6. Compliance & Policy Engine

- Grace time, late-coming rules
- Overtime calculation
- Weekly offs and holiday rules
- Customizable shift rosters
- Auto-shift detection

3.4 Leave Management

Source: `Leave Management Module.pdf`

Complete leave lifecycle from application to approval with policy enforcement.

Core Functions

1. Apply for Leave

- Leave types: Casual Leave (CL), Sick Leave (SL), Paid Leave (PL)/Earned Leave (EL), Maternity/Paternity Leave, Compensatory Off, Work From Home (WFH)
- Upload supporting documents (e.g., medical certificates)
- Options: full day, half day, hourly leave
- Real-time leave balance preview before applying

2. Leave Balance Tracking

- Real-time balance per leave type
- Carry-forward and lapsed leave tracking
- Auto-update on approval/rejection
- HR visibility rules for leave encashment/pending leaves

3. Leave Approval Workflow

- Multi-level configurable: Team Lead → Department Head → HR
- Approvers see leave history, workload impact, alternatives
- Instant notification post approval/rejection

4. Leave History Dashboard

- Status tracking: Approved / Pending / Rejected / Cancelled
- Export for any date range
- Integrated remarks for each approval decision

5. Holiday Calendar Integration

- Company-wide and region-specific calendars
- Auto-rejection for overlapping non-working days (optional)
- HR can announce new/restricted holidays

6. Policy Enforcement & Auto Rules

- Max leaves per month/year
- Minimum notice period
- Sandwich rule (if applicable)
- Late application penalties, blocked periods
- System-based eligibility checker

7. Notifications

- Email/SMS/system alerts for: submission, approval/rejection, unused leave reminders
- Manager alerts for long leaves

3.5 Payroll & Salary

Source: `Payroll & Salary Module.pdf`

Employee-facing payroll transparency and self-service.

Core Functions

Function	Details
Payslip Access	View/download monthly PDF payslips, annual salary slips, historical salary records
Salary Structure	Basic pay, HRA, special allowances, performance components, bonuses, incentives, overtime. Fixed vs variable breakdown
Tax Information	Monthly/annual TDS deductions, investment declaration status, tax saving projections, Form 16 download
Deductions & Reimbursements	PF, ESI, professional tax tracking. Reimbursement status (travel, phone, internet). Claim submission & tracking

Loan & Advance Management	Company loan/salary advance details, EMI schedule, pending balance, direct deduction status
Bonus & Incentive Details	Earned/upcoming bonuses, incentive structure linked to performance metrics

Integration Points

- **Input from Attendance**: present days, working hours, overtime → salary calculation
- **Input from Leave**: approved leave days → leave deduction or encashment
- **Input from Expense**: approved reimbursements → salary addition

---

3.6 Performance & Appraisal

Source: `Performance & Appraisal.pdf`

Structured performance management with transparency and continuous feedback.

Core Functions

1. Performance Review Dashboard

- Past/current appraisal results
- Department-wise and individual metrics
- Historical trends and improvement areas
- Personalized KPIs set by manager or HR

2. KPI & Goal Management

- Track assigned KPIs with weightage
- Monitor progress: individual, team, company goals
- Due dates, milestones, automatic deadline reminders

3. Manager & Peer Feedback

- Direct manager/team lead feedback
- 360° feedback from peers, subordinates, cross-functional teams
- Highlighted strengths and improvement areas
- Periodic feedback session summaries

4. Self-Assessment Portal

- Submit self-evaluations per appraisal cycle
- Rate performance against KPIs/goals
- Supporting achievements and qualitative comments
- Track submission status with acknowledgment

5. Appraisal Cycle Tracker

- Ongoing, upcoming, past cycles
- Automated timeline notifications
- Status: Pending → Under Review → Completed
- Historical report access

6. Recognition & Ratings

- Rating bands with justification notes
- Downloadable performance reports
- Grading mapped to compensation/bonus models
- Links to internal rewards and recognition programs

7. Dispute/Feedback Loop *(Optional)*

- Raise queries/disputes on submitted appraisals
- Track resolution status with HR/reviewer
- Add clarifications, missed achievements, additional evidence

---

3.7 Training & Development

Source: `Training & Development.pdf`

Continuous learning, skill development, and certification tracking.

Core Functions

1. Assigned Training Modules

- Training assigned by HR or reporting managers
- Types: onboarding, soft skills, compliance, domain-specific, leadership
- Formats: video, PDF, interactive quizzes, SCORM packages

2. Skill Development Programs

- Organization-curated or third-party programs
- Progress tracking: skills, certifications, proficiency levels
- Personalized suggestions based on role, department goals, career path

3. Progress & Completion Tracking

- Real-time progress dashboard
- Module-wise: completion %, time spent, assessment scores
- Auto-reminders for incomplete courses/deadlines

4. Feedback & Certification

- Post-training feedback (content quality, trainer, delivery)
- View/download training certificates
- Certificates stored in employee profile for appraisals/compliance

5. Training Calendar & Registration

- Interactive calendar: upcoming sessions, webinars, workshops
- Filter by location, department, topic, trainer
- Self-registration with approval flow
- Integration with Zoom, Google Meet, MS Teams

6. Notifications

- Alerts for new trainings, deadlines, updates, certificate availability
- Customizable: email, SMS, dashboard

7. Gamification & Leaderboard *(Optional)*

- Points and badges for milestones
- Department/organization leaderboards

3.8 Document Management

Source: `Document Management.pdf`

Secure, centralized platform for all HR document handling.

Core Functions

1. Centralized HR Document Access

- Appointment letters, employment contracts, NDAs, company policies, promotion/increment letters
- Smart categorization by type or department

2. Employee Document Uploads

- Personal/statutory documents: PAN, Aadhar, educational certificates, experience letters, medical certificates
- HR gets real-time notifications for new uploads

3. Digital Signature & Acknowledgment

- E-signature on offer letters, NDAs, policy updates
- Acknowledgment tracking for policy compliance
- Legal validation: audit trail with timestamp, IP, user ID

4. Automated Document Reminders

- Expiry/renewal alerts (ID proofs, licenses)
- Pending acknowledgment reminders via email/SMS

5. Downloadable Templates & Forms

- HR-provided templates (reimbursement forms, leave formats)
- Upload-ready standard formats

6. Role-Based Access Control

- Access permissions by role (employee, HR, manager)
- Confidentiality for sensitive HR documents

3.9 Expense & Reimbursement

Source: `Expense & Reimbursement.pdf`

Financial workflow management for work-related expenses.

Core Functions

1. Submit Expense Claims

- Eligible expenses: travel, food, accommodation, communication, miscellaneous
- Upload: receipts, invoices, bills (PDF/JPEG/PNG)
- Category tagging (Travel, Meals, Accommodation, etc.)
- Custom remarks for specific charges

2. Real-Time Tracking

- Status pipeline: Submitted → Under Review → Approved/ Rejected → Processed
- Email + in-app notifications per status change
- Historical records of all claims

3. Multi-Currency Support

- Multiple currency entries for global teams
- Automated currency conversion (real-time exchange rates)
- Local currency processing per company policy

4. Department-Wise Approval Workflow

- Customizable approval chains
- Department head/team lead notifications
- Auto-escalation for unapproved claims after deadline

5. Policy Compliance & Automation

- Built-in validation rules aligned with reimbursement policies
- Auto-flagging of non-compliant or duplicate claims
- Automated limits based on employee role/grade

6. Reports & Audit Logs

- Monthly/quarterly individual or department reports
- Full audit trail: submitted → reviewed → approved
- Downloadable summaries for tax/accounting

3.10 Communication & Collaboration

Source: `Communication & Collaboration.pdf`

Internal communication infrastructure for structured cross-org collaboration.

Core Functions

1. Internal Chat & Messaging

- One-on-one secure real-time messaging
- Group chats: department-based or project-specific
- Message history for reference
- File sharing: documents, images, links

2. Company-Wide Announcements

- Bulletin board: policy updates, holidays, events
- Push notifications: desktop and mobile
- Targeted messaging: segment-based (e.g., only Sales, only Remote staff)

3. Surveys, Suggestion Box, & Feedback

- Pulse surveys: satisfaction, stress, engagement checks
- Anonymous feedback submission

- Suggestion box: propose ideas, vote, track implementation
- Structured feedback forms for initiatives, trainings, events, policies

---

3.11 Helpdesk & Support Tickets

Source: `Helpdesk & Support Tickets.pdf`

Centralized service desk for HR, IT, and Admin support requests.

Core Functions

1. Service Request Submission

- Raise tickets from dashboard
- Categories: HR, IT, Admin, Payroll, Facilities
- Request types: ID card issuance, hardware problems, leave disputes, reimbursement delays
- Attachments: screenshots, documents

2. Ticket Categorization & Prioritization

- Auto/manual categorization
- Priority levels: Low, Medium, High, Critical
- Auto-routing to concerned department/team

3. Real-Time Ticket Tracking

- Status pipeline: Open → In Progress → Resolved → Closed
- Full communication logs visible
- Follow-up comments and additional info

4. Communication with Support Teams

- In-built messaging/chat per ticket
- Email + in-app notifications on status updates
- Escalation options if SLA breached

5. SLA Tracking & Reporting

- Pre-defined SLAs per query type
- Auto-escalation on SLA breach
- SLA compliance reports for support team evaluation

6. Feedback & Closure

- Resolution quality rating
- Mandatory feedback for critical/high-priority tickets
- Reopen option if issue persists

7. Analytics & Reports

- Department-wise ticket summary
- Average resolution time
- Monthly tickets raised/resolved

3.12 Settings & Preferences

Source: `Settings & Preferences.pdf`

Employee personalization and accessibility controls.

Core Functions

1. Notification Preferences

- Email alerts: toggle per category (attendance, approvals, announcements, payroll)
- SMS notifications: urgent updates (shift changes, leave approvals, emergencies)
- Push notifications: real-time in-app/mobile
- Category-wise preference settings
- Do Not Disturb mode: set quiet hours

2. Working Hours, Shifts, & Remote Work

- Preferred working hours (start/end time)
- Shift preferences: morning, evening, night (with auto-allocation

option)
- Remote work status: WFH, hybrid, in-office schedule
- Real-time remote status: available / busy / offline
- Optional GPS tagging for remote check-ins

3. Multi-Language & Accessibility

- Language selection: multiple supported portal languages
- Text size & display: font size, contrast mode, brightness
- Screen reader compatibility for visually impaired users
- Keyboard-only navigation mode
- Color blind mode: optimized visual settings

---

4. Role-Based Access Control (RBAC)

Based on the existing EBT project's RBAC architecture (Node.js + Express + Sequelize + PostgreSQL + Redis), adapted for HRMS:

Role Definitions

Role Key	Display Name	`isSystemRole`	`priority`	Description
`s-admin`	Super Admin	✓	100	Full system control. Manage organizations, all configurations
`admin`	Admin	✓	90	Organization-level administration. System settings, user management

`hr`	HR	✗	70	Full HR operations: policies, attendance mgmt, leave mgmt, payroll, appraisals, document control
`manager`	Manager	✗	50	Team oversight: approve regularizations/ leaves, view team dashboards, performance reviews
`employee`	Employee	✗	10	Self-service: clock in/out, apply leave, view payslips, raise tickets, manage profile
`worker`	Worker	✓	5	System/ background role for cron jobs, sync tasks, automated processes

Access Matrix by Module

Module	Employee	Manager	HR	Admin	S-Admin

Dashboard (own)	✓	✓	✓	✓	✓
Dashboard (team)	✗	✓	✓	✓	✓
Profile (own)	✓	✓	✓	✓	✓
Profile (others)	✗	👁 team	✓	✓	✓

System settings	✗	✗	✗	✓	✓

RBAC Architecture (Matching EBT Pattern)

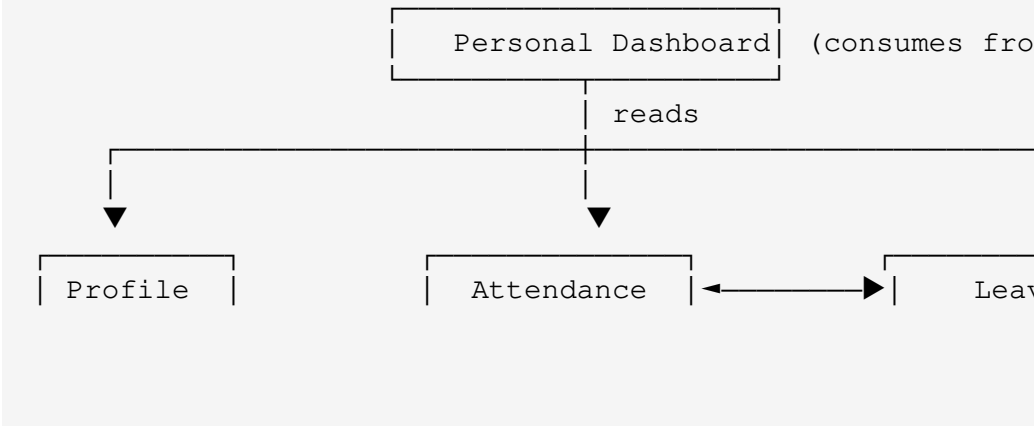

```
Request Flow:
┌──────────┐    ┌──────────────┐    ┌──────────────┐    ┌
│  Client  │──▶ │ authenticate │──▶ │  authorize   │──▶ │
│ (Bearer  │    │ (JWT verify, │    │ (role check  │    │
│  Token)  │    │  Redis BL)   │    │  from array) │    │
└──────────┘    └──────────────┘    └──────────────┘    └

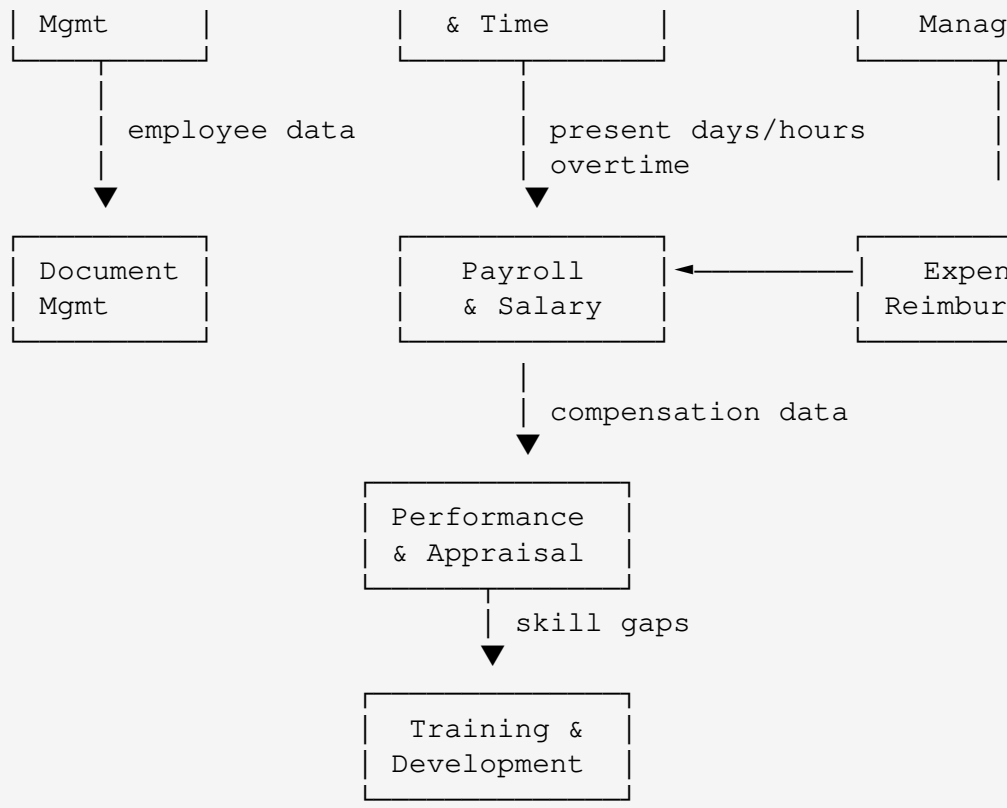

Token Payload:  { sub: userId, identifier, identifierType
Middleware:     authenticate → verifyToken → freeze req.u
Authorize:      authorize(['employee', 'manager', 'hr'])
```

---

5. Inter-Module Dependencies

Understanding how modules connect is critical for build sequencing:

```
Cross-cutting:
├── Communication & Collaboration ──▶ notifications to AL
├── Helpdesk & Support Tickets ──▶ service layer for ALL
├── Settings & Preferences ──▶ personalization for ALL mo
└── Holiday Calendar ──▶ shared by Attendance, Leave, Pay
```

Dependency Table

Module	Depends On	Feeds Into
Dashboard	Attendance, Leave, Payroll, Training, Communication, Holidays	— (display only)

Profile	— (foundational)	All modules (employee identity)
Attendance	Profile, Holidays, Shift/ Policy config	Payroll, Leave, Dashboard
Leave	Profile, Holidays, Leave Policies	Payroll, Attendance, Dashboard
Payroll	Attendance, Leave, Expense	Dashboard, Tax/ Compliance
Performance	Profile	Training (skill gaps), Payroll (bonus linkage)
Training	Profile, Performance	Profile (certifications), Performance
Document Mgmt	Profile	Compliance, Profile
Expense	Profile	Payroll
Communication	Profile	All modules (notifications)
Helpdesk	Profile	SLA reporting
Settings	Profile	All modules (preferences)

---

6. Technology Stack Alignment

Based on the existing EBT project codebase analysis, the HRMS will follow the **exact same architectural patterns**:

Stack

Layer	Technology	Notes
Runtime	Node.js	JavaScript backend
Framework	Express.js	HTTP routing, middleware chain
ORM	Sequelize	PostgreSQL models, migrations, associations
Database	PostgreSQL	Primary data store, UUID PKs, JSONB for flexible fields
Cache/ Sessions	Redis	Token blacklisting, session management, caching
Auth	JWT (jsonwebtoken)	Access + Refresh tokens, role in payload
Password Hashing	Argon2	Via `argon2` npm package
Validation	Custom validators	Request validation layer
Error Handling	AppError class	Custom error class with status, errorCode, auto stack trace
Configuration	`config/ default.json` + `.env`	JSON config file + env vars

Architectural Patterns (from EBT)

```
src/
├── app.js                                  # Express app set
├── server.js                               # HTTP server, DB
├── common/
│   ├── middlewares/
│   │   ├── auth.middleware.js               # authenticate +
│   │   └── error.middleware.js              # Global error h
│   └── utility/
```

```
│       ├── appError.utility.js          # Custom AppErro
│       ├── jwt.utility.js               # generateAccessT
│       ├── hash.password.utility.js     # hashPassword, v
│       └── ...
├── infrastructure/
│   ├── database/
│   │   ├── connections.database.js      # Sequelize + Red
│   │   ├── models.index.js              # Auto-loads all *
│   │   ├── migrations/                  # Sequelize migrat
│   │   └── seeders/                     # Seed data (roles
│   ├── cache/redis.js                   # Redis client
│   └── ...
└── modules/
    └── _core/
        └── auth/
            ├── auth.index.js            # Module registra
            ├── controllers/             # HTTP handlers (
            ├── services/                # Business logic
            ├── repositories/            # Data access (Se
            ├── models/                  # Sequelize model
            ├── routes/                  # Express routers
            └── validators/              # Request validat
```

Key Pattern: Each module follows `routes → controllers → services → repositories → models` with the `auth.middleware` applied at the route registration level in `{module}.index.js`.

---

7. Phased Build Roadmap

Phase 0: Foundation (Week 1–2)

> Project scaffold, shared infrastructure, auth system

- ☐ Project initialization (npm init, folder structure, config files)

- ☐ Database setup: PostgreSQL + Sequelize + migrations infrastructure
- ☐ Redis setup: connections, retry logic, monitoring
- ☐ Auth module: signup, login (email+password, OTP), JWT, refresh tokens
- ☐ RBAC: roles table seeding (s-admin, admin, hr, manager, employee, worker)
- ☐ User & UserProfile models with role assignment
- ☐ authenticate + authorize middleware
- ☐ AppError, global error handler, response wrapper
- ☐ Settings & Preferences module (notification prefs, language, accessibility)

Phase 1: Core HR Operations (Week 3–7)

> The modules employees and HR use daily

- ☐ **Profile Management** — personal info, emergency contacts, document uploads, employment history, HR approval workflow
- ☐ **Attendance & Time Tracking** — clock in/out (web), dashboard, regularization requests, approval workflow, policy engine, shift management, holiday calendar
- ☐ **Leave Management** — apply leave, balance tracking, multi-level approval, leave policies, holiday calendar integration
- ☐ **Personal Dashboard** — quick overview, notifications, calendar widget, customizable layout

Phase 2: Financial & Growth (Week 8–11)

> Payroll, performance, documents

- ☐ **Payroll & Salary** — payslip access/download, salary structure view, tax info (TDS, Form 16), deductions, loan/advance tracking, bonus details
- ☐ **Performance & Appraisal** — KPI/goal management, self-assessment, manager/360° feedback, appraisal cycles, ratings
- ☐ **Document Management** — HR document access, employee uploads, e-signature, acknowledgment tracking, automated

reminders

Phase 3: Engagement & Finance (Week 12–15)

> Employee engagement and expense management

- ☐ **Expense & Reimbursement** — claim submission, receipt upload, category tagging, multi-currency, approval workflow, policy compliance, audit logs
- ☐ **Communication & Collaboration** — internal chat (1:1 + groups), announcement board, push notifications, surveys, suggestion box, anonymous feedback
- ☐ **Training & Development** — assigned modules, skill programs, progress tracking, certifications, training calendar, registration flow

Phase 4: Support & Polish (Week 16–18)

> Support infrastructure and final polish

- ☐ **Helpdesk & Support Tickets** — ticket submission, categorization, SLA tracking, in-ticket chat, escalation, feedback, analytics
- ☐ Cross-module notification system consolidation
- ☐ Mobile responsiveness pass across all modules
- ☐ Performance optimization, caching strategy
- ☐ Security audit: RBAC review, input sanitization, rate limiting
- ☐ E2E testing, load testing, UAT

> **This document is the single reference for the entire HRMS Employee Panel build. All module implementations should be validated against the requirements documented here.**
