Helpdesk / Support Tickets

🌐 **Overview:**

The **Helpdesk / Support Tickets** module within the HRMS Employee Panel acts as a centralized platform for employees to raise and manage queries or service requests related to **HR, IT, and Admin** departments. It ensures faster resolution, better accountability, and transparent tracking.

🔧 **Key Functionalities:**

1. Service Request Submission

- Employees can raise support tickets directly from their dashboard.
- Selectable categories: HR, IT, Admin, Payroll, Facilities, etc.
- Multiple request types like ID card issuance, hardware problems, leave disputes, reimbursement delays, etc.
- Option to add attachments, screenshots, or documents for better context.

2. Ticket Categorization & Prioritization

- Automated or manual categorization of issues for better queue management.
- Priority levels: Low, Medium, High, Critical.
- Auto-routing to concerned department/team based on issue type.

3. Real-Time Ticket Tracking

- Dashboard showing ticket status: Open, In Progress, Resolved, Closed.
- Ticket history with all communication logs visible.
- Option to add follow-up comments or additional information.

4. Communication with Support Teams

- In-built messaging/chat interface within each ticket.
- Email and in-app notifications on status updates.
- Escalation options if SLA is breached or no response within time frame.

5. SLA Tracking & Reporting

- Pre-defined **SLA (Service Level Agreements)** for different types of queries.
- Auto-escalation alerts if tickets cross SLA timelines.
- SLA compliance report for support team performance evaluation.

6. Feedback & Ticket Closure

- Employees can rate the resolution quality.
- Mandatory feedback before closing critical/high-priority tickets.
- Reopen option available if issue persists post-resolution.

7. Analytics & Reports

- Department-wise ticket summary.
- Average resolution time.
- Number of tickets raised/resolved per month.

📋 **Reference Template Format – Helpdesk / Support Ticket Panel**

Feature	Description
Ticket Category	HR / IT / Admin / Payroll / Compliance / Facilities
Ticket Priority	Low / Medium / High / Critical
Submit Request	Form with title, description, attachments, and category selection
Status Stages	New → Assigned → In Progress → Resolved → Closed
Live Chat/Comments	Ticket-based internal communication interface
SLA Timer & Alerts	Visual indicators for SLA deadline, escalation flags
Support Team Assignment	Auto/manual allocation based on department and availability
Employee Feedback	5-star rating + text comment after ticket closure

Feature	Description
Reports & Insights	Ticket volume, SLA compliance, average response time, satisfaction scores
Search & Filter	Filter by date, category, priority, status, or keyword

---

🏁 Summary:

The Helpdesk module within HRMS improves employee satisfaction by resolving queries systematically and transparently. It reduces manual follow-ups, streamlines department coordination, and ensures issues are resolved in a timely manner with full tracking and accountability.
