🖥️ HRClouds Manager Panel – Dashboard Overview

1. Dashboard Overview

This is the central screen managers see immediately after logging in. It's designed for clarity, visual appeal, and quick access to essential metrics and actions.

- **Top KPI Tiles**
    - **Headcount** – Displays the current total number of employees with trend indicators (↑/↓) compared with the previous period.
    - **Attrition Rate** – Monthly/year-to-date percentage of employee exits, with trend arrows and comparisons to company averages.
    - **Attendance Summary** – Shows today's present vs. absent count, along with average monthly attendance percentage.
- **Visualizations**
    - **Headcount Trend Chart** – A line chart showcasing the employee count evolution over the last 12 months.
    - **Attrition Breakdown** – A bar chart comparing voluntary and involuntary departures by department.
    - **Attendance Heatmap** – Daily attendance mapped over the past 30 days for insights into seasonal patterns.

These align with best practices in HR dashboards, blending workforce metrics, turnover rates, and absenteeism into a cohesive, actionable view [themeforest.net+7multipurposethemes.com+7smarthr.co.in+7technologyadvice.com+1humanresourcewebinars.com+1aihr.com+1technologyadvice.com+1](#).

---

2. Announcements & Alerts

This panel keeps managers informed and proactive.

- **Company Announcements** – A readable list featuring new policies, upcoming townhalls, or organizational updates.
- **Alerts**
    - **Low Attendance Alert** – Triggered when department attendance dips below a configured threshold.

- **High Attrition Warning** – Flags when attrition in any team exceeds preset limits.
- **Birthday/Work Anniversary Reminders** – Helps managers engage with their team on special occasions.

Real-time alerts enable timely responses to workforce changes .

---

3. Quick Links

Designed for speed and efficiency, these direct managers to their most frequent tasks:

- **Leave Approvals**
  - Displays the number of pending requests; clicking leads to a list view with detailed info and approve/decline options.
- **Interviews Today**
  - A reminder of scheduled candidate interviews with links to the interview schedule and candidate profiles.
- **Pending Requests**
  - Aggregates open tasks: timesheet submissions, travel approvals, training enrolment requests, etc.

Centralizing manager tasks ensures smooth operational workflows .

---

4. Template Wireframe Structure

Here's a clean structure to visualize the layout:

Section	Position	Contents
Header + Profile Widget	Top	Company logo, panel title ("Dashboard"), manager name & profile icon
KPI Summary Tiles	Below Header	Headcount, Attrition Rate, Attendance tiles (3 tiles in a row)
Charts Panel	Left / Center	Headcount trend, Attrition breakdown, Attendance heatmap

Section	Position	Contents
Announcements / Alerts	Right sidebar	Scrolling list of notes and critical alerts
Quick Links	Footer row	Icons/buttons for Leave Approvals, Interviews Today, Pending Requests

---

5. Interactions & Responsiveness

- **Tile Drill-down**: Click on any KPI tile to navigate to a detailed page (e.g., Headcount → department-wise breakdown).
- **Chart Filters**: Allow filtering metrics by date range, department, or location.
- **Dismissible Alerts**: Managers can acknowledge alerts to clear them from the list.
- **Responsive Design**: Layout adapts gracefully between large desktop and tablet/mobile views, maintaining usability on smaller screens.

---

6. Data Sources & Refresh

- **Real-Time & Batch Updates**: Attendance via live punch-in data; headcount and attrition updated daily.
- **Configurable Thresholds**: HR admins set alert thresholds (e.g., alert when attendance drops below 85%).
- **Secure Access**: Only manager-level users can view KPIs for their own department/team.

---

7. Styling & Template

- **Branding for HRClouds**
    - Primary colors: #2A6EBB (blue), #F5A623 (warning), #28A745 (success)
    - Clean sans-serif fonts (e.g., Roboto, Open Sans)
    - Use card-based UI with clear icons and responsive grid layout
- **Starter Template Recommendation**

- Consider bootstrapping with **AdminLTE** or **ArchitectUI Bootstrap 5** — both offer widget libraries and chart components suitable for HR dashboards elements.envato.com+4pinterest.com+4pinterest.com+4beyondintranet.com+13dribbble.com+13dribbble.com+13arxiv.org+6aihr.com+6beyondintranet.com+6dribbble.com+5colorlib.com+5creative-tim.com+5.

✅ **Final Checklist Before Development**

- Define KPIs with HR for clarity on headcount logic.
- Establish alert thresholds and notification rules.
- Integrate attendance data source.
- Design wireframes and share for stakeholder feedback.
- Choose frontend template and set up responsive grid.
- Build drill-down routes and secure access controls.
