🎯 Template: Employee Management Panel

1. Overview

A central dashboard within the website management panel to view, manage, and organize employee records and their lifecycle statuses.

---

2. Core Features

2.1 View / Edit All Employee Profiles

- **Bulk Listing**: Searchable, filterable list of all employees (name, ID, department, role, status).
- **Profile Details**: Clicking an entry opens a full profile displaying:
    - Personal info (photo, contact details, address).
    - Employment details (start date, department, role, manager).
    - Status history (active, on leave, resigned, terminated).

2.2 Add / Remove Employees

- **Add Employee Wizard**:
    1. Personal details form.
    2. Role, department, manager assignment.
    3. Option to upload documents during onboarding.
    4. Submit and notify the new employee.
- **Remove Employee Workflow**:
    - Options: Mark as Resigned or Terminated.
    - Capture exit date, final settlement info, and exit reason.
    - Trigger offboarding actions: document archive, system access revocation.

2.3 Upload Documents

- **Supported Document Types**: Offer letters, ID proofs, contracts, certifications.
- **Management**:

    - Upload multiple files per employee.
    - View, download, replace, or delete documents.
    - File metadata: type, upload date, expiry (if applicable), uploader name.

2.4 Assign / Change Departments, Roles & Reporting Managers

- **Assignment Controls**:
    - Single or bulk editing of department, role, and manager.
    - Dropdowns populated from organizational hierarchy.
- **Change Tracking**:
    - Log each change with user, date/time, and previous values.
    - View history per employee for audits.

2.5 Manage Employee Status

- **Status Options**:
    - Active, On Leave, Resigned, Terminated.
- **Leave / Resignation Process**:
    - If “On Leave”: specify leave type, duration, and manager approval.
    - If “Resigned” or “Terminated”: exit date, reason, and offboarding checklist.
- **Approval Flow**:
    - Configurable workflows (e.g., manager & HR sign-off).
    - Notifications at each stage.

---

3. UX / UI Layout

- **Dashboard View**: Summary widgets (e.g., total employees, new hires this month, employees on leave).
- **Table Interface**: Display core employee attributes with inline filters (e.g., by department or status).
- **Profile Page**:
    - Tabbed interface: **Details**, **Documents**, **Status History**, **Activity Log**.

    - Action buttons for editing, uploading, changing assignments, or adjusting status.

---

4. Permissions & Security

- **Role-Based Access Control (RBAC)**:
    - Only HR/Admin can add/remove and upload documents.
    - Managers can edit profiles of their team.
    - View-only mode for read-only roles.
- **Activity Audit Logs**:
    - All changes logged (who, what, when).
    - Accessible under each profile's **Activity Log** tab.
- **Document Access**:
    - Ensure user permissions verify before allowing download or view of any file.

---

5. Notifications & Reporting

- **Notifications**:
    - Email alerts on status change requests, document uploads, approvals needed.
- **Reports**:
    - Exportable reports: current employee directory, leaves summary, terminated employees, dept-wise headcount.

---

6. Technical Notes

- **Data Model**:
    - Tables: Employees, Documents, Departments, Roles, Managers, Statuses, ActivityLogs.
- **Integrations**:

    - Optionally integrate with external HR systems or ERP (e.g., for payroll).
- **Validation**:
    - Ensure document types and fields validate correctly (e.g., mandatory fields, file type restrictions).

🖊️ How to Use This Template

1. Copy the sections above into your documentation or project requirement doc.
2. Customize terminology and visual placeholders to match your organization's style.
3. Add UI mockups or wireframes alongside if available.
4. Expand on approval logic or API requirements as needed.
