📊 Payroll & Compensation Panel – Feature Overview

1. Generate Monthly Payroll

- **Calendar view or monthly selector** – Choose the payroll period.
- **Review payroll summary** – Display total employees, gross salary, net payout, total deductions.
- **Auto-calculate pays** – Based on time logs, salary structures, attendance data, and policy rules.
- **Generate payroll run** – Option to preview before confirming, with audit history and timestamp.

---

2. View / Modify Salary Structures

- **Salary structure dashboard** – List of roles/departments with current salary bands.
- **CRUD operations** – Create, edit, delete salary templates.
- **Component breakdown** – Base pay, allowances (HRA, transport), benefits, increment percentages.
- **Versioning/logs** – Record history of changes, effective dates, and change authorship.

---

3. Process Bonuses, Incentives, and Deductions

- **Bonus & Incentive dashboard** – View pending bonus requests or auto-eligible payouts.
- **Add manual bonuses or deductions** – Enter by employee or bulk (e.g., festival bonus, performance incentive).
- **Define rules** – Set conditions like 5% of gross salary for high performers.
- **Preview impact** – Simulate effect on net payslips before approval; status change tracking.

---

4. Manage Reimbursements and Benefits

- **Employee submission portal** – Employees submit reimbursements with attachments.
- **Manager approval flows** – Multi-level approval (e.g., manager → finance).
- **Benefit administration** – Link health insurance, travel, meal plans to payroll runs.
- **Records & tracking** – Track submission dates, statuses (Pending / Approved / Rejected), and payment timestamps.

---

5. Download Salary Reports & Payslips

- **Payslip generator** – Create PDF payslips detailing gross, deductions, net pay, taxes, bonuses.
- **Bulk download/export** – Option for all employees or filtered group.
- **Reports dashboard** – Pre-built templates: Payroll register, cost center analysis, deduction summary.
- **Custom reports** – Filterable by date range, department, employee, salary component.
- **Export formats** – CSV, Excel, PDF; secure access per user role.

💡 **UI & UX Considerations**

Section	UI/UX Element	Notes
Generate Payroll	Progress bar, confirmation modals	Supports preview/review steps
Salary Structures	Tables with inline editing	Version history, effective dates visible
Bonuses & Deductions	Filters and bulk upload	CSV support, reject/approve flows
Reimbursements	Itemized lists, attachment thumbnails	Status tracking, comments

Section	UI/UX Element	Notes
Downloads	“Download All” button, email schedule	Role-based access control, archive logs

---

📁 Recommended Admin Templates

- **AdminLTE 3** – A popular, responsive Bootstrap admin template suitable for HR/payroll modules dribbble.com+1creativemarket.com+1smartsheet.comcolorlib.com+1instapage.com+1.
- **Tabler Admin** – Clean, free HTML template that’s ideal for building dashboard components tabler.io.
- **Payrole UI Kit** – A specialized Figma/Sketch kit designed for payroll management interfaces creativemarket.com.

🛠 Sample Wireframe Flow

1. **Dashboard Home** with snapshot metrics (e.g., #Payslips issued this month, Pending reimbursements).
2. **Payroll Run** page: select period → preview → confirm → generate logs.
3. **Salary Structures**: view/edit templates, revision history, link to impact analysis.
4. **Extras & Deductions**: add bonuses/deductions (individual or bulk), status preview.
5. **Reimbursements**: await approvals, view history, attach files.
6. **Reports & Downloads**: filterable reports list, bulk/payslip download, export logs.

✅ Steps to Implement

1. Choose a base template (e.g. AdminLTE, Tabler, Figma UI Kit).
2. Replace placeholder data with real HR/payroll datasets.
3. Implement workflows for access control, approvals, and logs.
4. Integrate payroll engine and payslip generator.

5. Add export capabilities and scheduled email delivery.
6. Conduct user testing to ensure clarity and compliance.
