Recruitment Management Module

1. Create & Post Job Openings

- **Form-based job creation**: Title, department, location, type (FT/PT), description, skills, qualifications, salary range, closing date.
- **Rich-text job editor**: Allow formatting, media embeds (images/videos), and templates for consistency.
- **Multi-channel publishing**: Post jobs to career page, external job boards (LinkedIn, Indeed), and social media with a single click.
- **Draft & preview**: Save as draft, preview in public view, then publish.
- **Analytics snapshot**: Quick stats (views, clicks, applications) on live posts—modeled after recruitment dashboards budibase.com+14geckoboard.com+14themeforest.net+14.

---

2. Schedule Interviews & Assign Panels

- **Candidate calendar view**: List pending interviews with filters (role, status, date).
- **Panel assignment**: Add interviewers (from user list), define roles (e.g. Technical, HR, Manager).
- **Availability sync**: Integrate with Outlook/G™ Calendar to show and select availability.
- **Automated invites**: Send calendar invites to candidates and panel members with interview details and prep materials.
- **Interview templates**: Pre-plan formats (coding test, behavioral) and evaluation criteria.

---

3. Track Candidate Progress

- **Kanban/Stage tracker**: Columns like Applied → Screened → Interview → Offer → Hired/Rejected.
- **Candidate timeline**: View every step for each candidate: application date, screening, panel assignments, notes, outcomes.

- **Activity log**: Record recruiter actions with timestamps for audit purposes.
- **Alerts & reminders**: Notifications for unrated interviews, missed steps, upcoming deadlines.

---

4. Manage Offer Letters & Onboarding Documents

- **Offer letter generator**: Auto-fill templates with candidate name, role, salary, start date; allow versioning and approval.
- **E-signature integration**: Embed tools like DocuSign or Adobe Sign for quick acceptance.
- **Document portal**: Upload and track onboarding docs: offer letters, NDAs, policy acknowledgments, ID proofs.
- **Onboarding checklist**: Assign tasks to candidates (submit documents, complete forms) and to HR (create IT accounts, schedule orientation).
- **Status dashboard**: Track which docs are pending, complete, or overdue.

Panel UI & Technical Notes

Dashboard Home

- Summary cards: Active jobs, candidates in pipeline, upcoming interviews, offers awaiting acceptance.
- Calendar section: Interviews and onboarding events.
- Quick action buttons: “Create Job”, “Schedule Interview”, “Generate Offer”.

Navigation Menu

- **Recruitment**
    - Jobs & Postings
    - Candidates & Pipeline
    - Interviews & Panels
    - Offers & Onboarding

Design Considerations

- **Responsive layout**: Full support for desktop, tablet, and mobile.
- **Consistent theming**: Use cards, tables, modals, Kanban boards.
- **Access control**: RBAC to restrict module access (e.g., only HR can generate offers).
- **Audit & logs**: Maintain history of changes, emails sent, documents uploaded.
- **Search & filter**: Filter candidates by job, stage, date, skills.
- **Integrations**: Calendar, email (SMTP / G-Suite), e-signature, external job boards.
