Reports & Analytics

1. HR Reports

Provide deep insights into workforce dynamics with automated, up-to-date reporting:

- **Headcount & Demographics** – Real-time total employees with filters for department, location, employment type (full-time, part-time, contract).
- **Turnover & Retention** – Monthly/yearly attrition rates, new hires vs. exits, tenure analysis, reasons for leaving.
- **Leave Management** – Visual leave balances, types (sick, vacation), approvals pipeline, and trends over time.
- **Payroll Overview** – Summary of pay runs: gross/net amounts, allowances, deductions, bulk flags for anomalies, integration with payslips.

Tip: Present these through interactive dashboard widgets alongside tabular data for easy patterns and exceptions spotting.

---

2. Custom Report Builder

Empower managers to build tailored, ad-hoc insights without developer help:

- **Drag-and-Drop Interface** for selecting data sources, fields, filters, grouping, and sorting. Support complex logic (e.g., headcount by branch for permanent staff).
- **Saved Templates & Sharing** – Save customized reports, share with other users, or make them company templates.
- **Flexible Output Formats** like tables, pivot-style views, visual charts (bar, line, pie).
- **Data Enrichment** – Include custom metrics (e.g., cost per hire, average leave duration). Based on best practices learning.sap.com+1paycom.com+1.

---

3. Export to Excel / PDF

Export-ready features should include:

- **Tabular Exports** (.xlsx/.csv) with formatting options to suit finance/HR needs.
- **Print-Ready PDFs** with report-specific branding, headers/footers, page numbering.

- **Batch Export** – Run and package multiple report templates at once.
- **Embedded Visuals** – Include charts in PDFs or generate separate images for presentation use.

These export options match enterprise-grade expectations .

---

4. Automated Monthly Reports

Schedule recurring distribution of insights without manual effort:

- **Scheduler Interface** – Pick report(s), frequency (weekly, monthly), recipients (email/SFTP).
- **Dynamic Parameters** – Each run updates fields like "this month", preserving freshness.
- **Delivery Formats** – Attach as Excel, PDF, or include links to live dashboards.
- **Notification Dashboard** – Track past reports, delivery status, and auto-alert failures.

Inspired by SAP SuccessFactors and similar platforms learning.sap.com+122562161.fs1.hubspotusercontent-na1.net+1.

---

5. Advanced Website Analytics (Supplemental)

Extend beyond HR data to deliver holistic website insights:

- **Traffic & Conversion Funnels** – User flows from landing to conversion, funnel drop-off analysis en.wikipedia.org+13uxcam.com+13cobblestonesoftware.com+13.
- **Session Tracking & Heatmaps** – Where users click, scroll, and stare—highlighting optimization hotspots uxcam.com+4yokellocal.com+4whatagraph.com+4.
- **Real-Time Dashboards** – Surface hourly metrics, internal traffic filters, bot detection yokellocal.com.
- **KPIs & Alerts** – Auto KPI thresholds trigger alerts if bounce, conversions, or load-time go off-script.

---

6. Dashboard & Visualization Tools

Present data beautifully and accessibly:

- **Executive Summary Dashboards** – High-level metrics: headcount trends, turnover %, absenteeism rate, traffic source breakdown, conversion rate.
- **Multi-widget Views** – Combine tables, charts, counters in bespoke dashboards.
- **Interactive Drill-Downs** – Click on a chart element to view deeper detail (e.g., drilling into departmental turnover).
- **Cross-data Insights** – Overlay HR and website metrics—for instance, hiring spikes tied with traffic surges or performance issues.

---

7. Best Practices & Governance

Ensure integrity, usability, and security:

- **Access Control with Roles** – Limit who can view/edit HR/payroll vs. web analytics reports.
- **Data Governance Alerts** – Flag missing or stale data feeds (e.g., if Google Analytics tag is missing) support.squarespace.com+8yokellocal.com+8blog.hubspot.com+8productive.io.
- **Annotations & Context** – Allow notes on anomalies (e.g., "holiday affected numbers") for easy interpretation.
- **Audit Trails** – Log report creation, export actions, and scheduled distribution history.

Sample Monthly Reporting Workflow

1. HR or Admin selects template “Monthly Workforce Review”
2. Scheduler runs it automatically on 1st business day
3. PDF and Excel versions emailed to HR, Finance, Executive team
4. Live dashboard updated and dashboards refreshed
5. Recipients log in to drill into conversions, leave spikes, or team-level trends

---

🎯 Summary

This comprehensive **Reports & Analytics** panel delivers:

- Complete HR insights: headcount, turnover, leave, payroll
- Ad-hoc and templated custom reporting
- Robust export and scheduling workflows
- Integrated web analytics for deeper user and site insights
- Secure, governed dashboards tailored for all stakeholders
