📋 Attendance & Leave Management Panel Template

1. Overview Dashboard

- **Widgets/Cards:**
    - Today's attendance rate (e.g., 95% present)
    - Pending leave requests
    - Summary: remote/WFH employees, shift adjustments, upcoming holidays

---

2. Attendance Logs

- **Daily View:**
    - Tabular view: Date, Employee, In-time, Out-time, Total Hours, Status (Present/Late/Absent), Location (onsite/WFH)
    - Quick "Mark Absent" or "Edit Times" buttons per row
- **Monthly Summary:**
    - Interactive calendar heatmap showing presence/absence
    - Export options: CSV, Excel, PDF

---

3. Leave Requests

- **Pending Approvals:**
    - List with Employee, Type (Sick, Casual, etc.), Date Range, Reason preview
    - Action buttons: ✅ Approve / ❌ Reject / ⚙️ More (to view full details)
- **Leave History:**
    - Filter by type/status/date
    - Export options

---

4. Shift & Holiday Configuration

- **Shift Timings:**

    - List of predefined shifts (e.g. Morning, Evening, Night) with start/end times
    - Button to “Add New Shift”
    - Option: apply shift globally or assign per department/team
- **Holiday Setup:**
    - Calendar interface to mark holidays (one-day, multi-day, recurring)
    - List view with ability to Export/Import holidays list

---

5. Import / Export Attendance Data

- **Import Attendance:**
    - File upload (CSV/Excel)
    - Mapping dialog (“Select columns for Employee ID, Date, In/Out Time…”)
    - Preview & Validate data, report errors
- **Export Attendance:**
    - Options: daily, weekly, monthly, custom range
    - Format: CSV, Excel, PDF

---

6. Remote / WFH Tracking

- **Remote Log View:**
    - Records of remote/WFH check-ins, durations, activities
    - Employee, Date, In/Out times, Total remote hours, Notes
- **Compliance / Reporting:**
    - Summary: weekly/monthly total WFH hours per employee
    - Exportable as CSV/Excel

🎨 **Recommended UI Templates**

- **Nodo – HR Management Dashboard (Figma)**
  Includes well-organized sections for **Attendance**, **Leave**, **Payroll**, etc. — ready to adapt into your panel
  etsy.com+4wrapbootstrap.com+4slideteam.net+4timedoctor.com+5notion.com+5dribbble.com+5etsy.comtimedoctor.com+1community.fabric.microsoft.com+1community.fabric.microsoft.comthemeforest.net.
- **Retool Leave Management Dashboard**
  A practical example for managing leave requests & visual summary cards
  etsy.com+7retool.com+7community.fabric.microsoft.com+7.
- **ThemeForest "SmartHR – HRMS Admin Dashboard"**
  Comprehensive UI theme featuring attendance, leave, employee modules
  themeforest.net+3themeforest.net+3themeforest.net+3.

✅ **Suggested Structure for Your Panel**

A. Sidebar Navigation

markdown

CopyEdit

1. Dashboard (Summary)

2. Attendance Logs

3. Leave Requests

4. Shift & Holiday Settings

5. Data Import/Export

6. Remote/WFH Logs

B. Dashboard (Landing Page)

- High-level metrics in cards
- Charts: monthly attendance %, pending leaves over time, WFH vs onsite trends

C. Details Page (per module)

- Filters panel: date range, team, status, type
- Data table with action buttons

- Contextual actions (e.g., assign shift, approve leave)
- Options for import/export or configuration at the top

🛠️ Tips for Implementation

- **Visual Design:** Use clean tables with filtering, color indicators (e.g., green = present, red = absent).
- **UX Enhancements:** Inline actions next to data rows for faster task flow.
- **Data Validation:** During import, preview the data and show errors before final upload.
- **Reporting:** Provide downloadable reports and dashboard charts for insights.
